HIGHLIGHTS OF ACCOMPLISHMENTS

RESEARCH

The Philippine Heart Center is a trailblazer and a Center for Excellence in cardiovascular research and development. PHC conducts over 150 researches every year and is one of only a few hospitals in the Philippines that does experimental surgical research in animals and development of surgical instruments. The scope of research includes hospital-based development of diagnostic and therapeutic procedures and community-based prevention of cardiovascular diseases.

	2010	2011
Number of Researches Completed		
Medical	136	106
Nursing	8	10

PUBLIC INFORMATION & COMMUNITY SERVICE

The PHC's corporate social responsibility benefits the public through its information and community service programs.

The monthly People's Day free clinics and consultation program is an activity that combines heart disease awareness lay forum, promotion of heart care, nutrition/dietary counseling and free medical examinations.

PHC also conducts blood-letting activities outside of the hospital, combined with public awareness and advocacy for Voluntary Blood Donation program of the Department of Health.

The Philippine Heart Center also actively promotes care of the environment by complying with best practices in Health Care without Harm and Solid Waste Management, thereby earning recognition and awards from government agencies. A recent advocacy of the PHC is the use of biodegradable materials for food packaging.

The PHC Eco-Botanical Garden was launched in 2011 which provides herbal plants and vegetables for the hospital's main kitchen and cafeteria.
