

⚠️ HEIGHTENED ALERT ⚠️

IPCO ADVISORY

COVID-19: Variants

Genetic Variants of SARS COV-2 have been emerging and circulating around the world. One of which is the COVID-19 Delta Variant that spreads **MORE easily and quickly** compared to other variants.

CDC, WHO 2021

⚠️ HEIGHTENED ALERT ⚠️

IPCO ADVISORY

**As a precaution, treat ALL COVID 19 cases as Delta variants.
Let us be STRICT in observing the following:**

The basics still WORK:

Perform Hand Hygiene,
Wear your mask.

Limit social movement.

Avoid crowded places.
Practice Social Distancing

Frequent check

on patients, companion
and co-worker for
COVID-19 like
symptoms

**If with symptoms,
DO NOT REPORT for work.
Proceed to ER Special Triage.**

Get vaccinated!

Practice these safety measures at all times and wherever you are (at home, work.)
